NEW ADHERENT MEMBER OF COPANT

THE NATIONAL STANDARDS BODY OF CHINA JOINS US

The Standardization Administration of People's Republic of China ([SAC](#)), established in April 2001 and authorized by the State Council to exercise administrative responsibilities by undertaking unified management, supervision and overall coordination of standardization works in China, recently joined our regional organization as an Adherent Member, and we will like to give them a warm welcome.

The SAC promotes the trade and economic growth and encourages the development of products, systems and services that are safe, efficient and environmentally friendly.

SAC represents China to join the International Organization for Standardization (ISO), the International Electrotechnical Commission (IEC) and other international and regional standardization organizations. SAC is responsible for organizing the activities of Chinese National Committee for ISO and IEC.

SAC approves and organizes the implementation of international cooperation and exchanging projects on standardization.

SAC believe that by joining COPANT will surely deepen their standards cooperation with COPANT and its member states, and promote connectivity of standards between China and the Pan American region.
